

DESCRIPTION AND RATING

12BN6 Gated-Beam Discriminator. Identical to the 6BN6 except for heater ratings. Refer to the 6BN6 Description and Rating sheet for complete data.

12BQ6-GA Beam Pentode. Identical to the 6BQ6-GA except for heater ratings and addition of a controlled heater-warm-up characteristic. Refer to the 6BQ6-GA Description and Rating sheet for complete data.

12BQ6-GTB Beam Pentode. Identical to the 6BQ6-GTB except for the following ratings:

Heater Voltage, AC or DC	12.6	Volts
Heater Current	0.6	Amperes
Heater Warm-up Time*	11	Seconds

* The time required for the voltage across the heater to reach 80 percent of its rated value after applying 4 times rated heater voltage to a circuit consisting of the tube heater in series with a resistance equal to 3 times the rated heater voltage divided by the rated heater current.

Refer to the 6BQ6-GTB Description and Rating sheet for complete data.
